- Brief company overview
- Contact information

Senior Software Engineer - Team Lead

The Perfect FinTech Job Description

Department: Engineering
Location: Remote

As a Senior Software Engineer - Team Lead, you will be at the forefront of driving innovation and shaping our cutting-edge payments solutions. Your expertise in functional programming, specifically Scala, will propel our engineering department's capabilities. From setting technical direction to collaborating with cross-functional teams, you'll play a crucial role in delivering new functionality that transforms the financial industry.

You will play a pivotal role in driving our cutting-edge payments solutions, contributing to the transformation of the financial industry.

Job Scope and Responsibilities:

- In-depth knowledge of Functional Programming, particularly Scala and the Typelevel ecosystem.
- Strong grasp of software architecture and design, capable of aligning solutions with the overall service architecture.
- Proven track record in building distributed systems.
- Experience maintaining and further developing existing code bases.
- Strong aptitude for knowledge sharing, teamwork, and relationship building.
- Ability to define task outlines and deliverables with meticulous attention to detail.
- Excellent communication skills, facilitating effective interaction with multidisciplinary teams.

Preferred Qualifications:

- Familiarity with Akka Cluster, Cassandra, Redis, Elasticsearch, and Kafka.
- Hands-on experience with Event Sourcing and CQRS methodologies.
- Understanding of JVM internals, coupled with expertise in performance optimization.

Benefits:

- Competitive salary and performance-based bonuses.
- Remote work opportunity, collaborating with global teams.
- Professional development and growth opportunities.
- Comprehensive health and wellness benefits.
- Vibrant company culture with a focus on innovation.
